

The ultimate in personal bailout...and a whole lot more.

DEUS 3100 for Firefighters is a powerful tool you really use.

You know the DEUS™ 3100 is the ultimate solution for personal rescue. But the 3100 is also designed to be a life-saver in other vertical situations.

- The DEUS 3100 is reversible (without rethreading the rope) so it can be used to easily and safely rescue multiple victims one after another. And it's fast – three people can be rescued from a 4th floor window in less than one minute. Getting people down and out of danger easily, safely and quickly just might make the DEUS 3100 your preferred method of evacuation.

- Rope can be pulled both ways through the DEUS 3100 and then locked off. This makes it easy to rig as a safety line for fall-protection.
- Because the DEUS 3100 can be set for hands-free operation in both "stop" and "go" modes, it is ideal for work positioning in vertical situations. Descend, stop, lock-off the rope, do what needs to be done with both hands free to work, and then continue descent.
- Use the DEUS 3100 to easily lower heavy objects (up to 300 lbs) safely under control.

When lives are on the line, trust DEUS Rescue.
