

“Big brother” is watching.

The easy, automatic and super-safe back-up belay.

DEUS Back-Up Belay Kits, built around the innovative DEUS 7300, provide superior belay to your primary system. The 7300 engages automatically, limits shock load and controls descent all the way to the ground.

Manually controlled back-up belay systems can lock-up and allow shock-load. Human belay operators can get distracted or simply react too slow. DEUS Back-Up Belay Kits change all of this.

The DEUS 7300

This NFPA-certified DEUS 7300 operates automatically, eliminating the need for an operator. The system is speed limited to guard against free fall, built with our exclusive “Soft Engagement Technology” to reduce shock load. Inside, its four redundant brakes automatically manage transition shock and provide redundant safety.

The 7300 is reversible without re-rigging, so it's ideal for training, evacuation and rescue. Plus, the DEUS 7300 is the only controlled descent device designed for all-day, every-day use.

DEUS 12 mm Rope

DEUS 12 mm Belay Rope is super strong 6,295 lbf MBS technical kernmantle rope, easy to work with and NFPA certified.

Choose Your Kit

There are two Back-Up Belay Kits available. Choose the basic kit for training, or the more advanced kit for both rescue and training. Both are packed in extra roomy DEUS Duffle Bags.

Choose the basic DEUS BT73 Back-Up Belay Kit for Training, or the more advanced DEUS BR73 Back-Up Belay Kit for Training & Rescue.

When lives are on the line, trust DEUS Rescue.
