

The glow-in-the-dark breadcrumb trail.

A simple solution for fast, effective search and rescue.

The DEUS Search Line Kit is a simple but effective search line system. It features the DEUS LKP Search Line rope, a superior glow-in-the-dark and reflective search line.

The DEUS Search Line Kit is simple technology – no gimmicks that add weight and complexity like other systems.

The DEUS Search Line Kit includes a main line, branch lines, connectors and super-bright LED flashlights. It's compact, lightweight and works every time.

DEUS Search Line Rope

The heart of the kit is DEUS LKP Search Line rope, a unique, patented rope designed especially as a firefighter search line. It really glows in the dark. Just shine a light on it for a few seconds, and watch it glow bright for up to 40 minutes. It also reflects light, so it's easily visible from up to 200 ft away.

DEUS LKP Search Line rope is made of flat-braid Kevlar. It is fire-resistant to 932°F and strong enough to be used as a haul line.

Simple to Use

The leader of the search team can set the DEUS Search Line Kit in less than a minute.

As the search team moves forward, the DEUS Search Line rope trails behind like glow-in-the-dark bread crumbs showing both the way in and the way out. Nothing could be easier or more effective.

Compact and More

The entire DEUS Search Line kit with a 200 ft main line and four 25 ft branch lines weighs only 4 lbs and fits in a single, compact bag.

It's available in two versions. Choose the DEUS FS01 Search Line Kit with an unflagged main line. The FS02 features a main line flagged with 6-inch pieces of 5 mm cord to provide directional guidance.

Each kit includes 6 DEUS-approved LED flashlights, the brightest, most compact available.

When lives are on the line, trust DEUS Rescue.
