

## Tactical and practical.

Simple, reliable, hands-free controlled tactical descent.

The DEUS TX32 Tactical Response Kit opens new possibilities for tactical rappelling and rescue.

Rappelling can be dangerous, especially in high-stress situations. The DEUS Tactical Response Kit is the answer, offering a complete solution for hands-free controlled descent with the DEUS 3200, and an anchoring system that is quick and easy to set in seconds.

### Controlled Tactical Descent

Black and silent, the DEUS 3200 controlled descent device is an innovation in tactical controlled descent. It operates hands free "stop" or "go" so troops can descend and use weapons at the same time, and perform challenging maneuvers. Plus it's reversible without re-rigging, so three to four people can descend from a 4th floor window, sequentially, in under a minute...all hands free.

The 3200 is speed-limited to guard against free fall, with four redundant brakes for extra safety, versatility and control. The device works only with super-strong, NFPA-certified DEUS 7.5 mm Escape & Rescue Rope (150 ft. included in kit).

### Anchor with Ease

Rigging with conventional anchors can be a hassle. The DEUS Tactical Response Kit includes a DEUS Quik-Set Dual Anchor Kit, a fast, versatile and easy anchoring solution that sets in seconds. The Quik-Set Anchor is one-hand adjustable to any length up to 25 ft., and requires no knot tying or edge protection.

### Packed for Quick Deployment

All of the gear in the DEUS Tactical Response Kit is packed in our innovative Tactical Carry/Deploy bag. This compact, two-part bag makes rigging for tactical rappelling, evacuation or rescue extra fast and easy. Its two parts separate so one person can rig the anchors while another prepares for descent.

The two parts of the innovative Carry/Deploy bag separate so rigging is quick and easy.

When lives are on the line, trust DEUS Rescue.
