

# BIGWIG™

Innovative tool marks door with GLOW marker then props door open.

Marking doors and keeping them from closing behind you during firefighting or search and rescue activities is critical. And now, this task just got a whole lot faster, easier and more reliable.

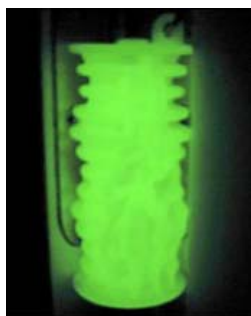

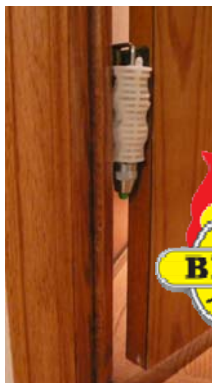

Introducing the BIGWIG™, from BIGWIG Rescue Products. The BIGWIG includes a fluorescent marker and acts as a positive door wedge, so you can mark the door then prop it open with one easy-to-use, lightweight and durable tool.

Unlike wooden door wedges, the BIGWIG won't slip out. Unlike other markers that burn off during a fire, the BIGWIG marker doesn't melt. The BIGWIG is small, lightweight and really works. Here's how:

- Mark the door first with the integrated glow-in-the-dark marker. You get a highly visible and heat-resistant mark on nearly any hard surface.
- Slip the BIGWIG over the hinge of the door. Done. The door is propped open during the search, and easy to retrieve upon exit.

The BIGWIG features a high-strength steel hook for easy over-the-hinge placement and removal. It's durable and designed for easy gripping, even with gloved hands. And it glows in the dark, so it's easy to spot in the dark.

Marking and propping open doors is simple, safe and reliable, with the BIGWIG.
