

What makes the DEUS 3100 the BEST firefighter bailout and rescue system?

Nothing is easier, safer, faster or more versatile.

Expensive? Yes...and worth it!

The DEUS 3100 Vertical Rescue System costs more than other systems, and firefighters who have used it understand why. It is the safest, fastest, easiest, toughest and most versatile system available. Plus, it comes with a Lifetime Warranty, so you only have to buy it once.

Part of a Complete Kit

The 3100 is available in a complete Firefighter Bailout & Rescue Kit, with several comfortable carry and deploy options to fit your turnout gear and harness.

Training Available

DEUS Rescue offers "Train-the-Trainer" training so your trainers can be certified to economically train, certify and re-certify your firefighters.

Hands free both "stop" and "go"

Use the DEUS 3100 pre-rigged and set to "go" – bailout is as simple as setting anchor, rolling out the window and letting go.

Speed limited to 3 meters/second

Jump from a 10 story building and the effect is the same as jumping off a chair.

Four redundant brakes

Includes 1) an always active centrifugal brake, 2) a control-knob activated drum brake, 3) a hands-free self-adjusting figure-8 brake, and 4) a precision control manual rope tailing brake.

Replaceable rope for training and work

No other system lets you change ropes more easily. Use the same 3100 device for both training and work – just designate separate ropes for each.

Reversible without re-rigging

Ideal for rapid sequential rescues without re-rigging – get three firefighters down from a 4th floor window, one at a time, in less than one minute!

Extremely versatile

Simply the best solution for bailout AND buddy rescue, civilian rescue, rapid sequential evacuations, confined space rescue, positioning, edge restraint and more.

Set to go

Exit and descend in one smooth motion – no sudden stop; no painful shock to you or the system. Clear a jam on the window ledge with one push.

Works with your anchor of choice

Use it with the Crosby hook, RPI hook, Tango snap-hook, an oversize carabiner or other NFPA-certified anchor, all available from DEUS Rescue.

Uses DEUS 7.5mm rope

DEUS double-construction kernmantle NFPA-certified rope is built to work with the DEUS 3100, and it's fire-, cut-, abrasion-, chemical- and UV-resistant.

When lives are on the line, trust DEUS Rescue.
