# DEUS<sup>TM</sup> 3300 Industrial Escape & Rescue Kits

Simple escape and rescue in two small, super-lightweight kits.

Thanks to the DEUS 3300, these full-featured escape and rescue kits are small, lightweight, flexible, fast and easy to use.

The DEUS 3300 Industrial Escape Kit is designed for safe, simple, fast hands-free escape. The Escape & Rescue Kit includes more gear to support more rescue situations.

Both kits are built around the DEUS 3300 controlled descent device – NFPA certified with a maximum descent speed of 3 meters per second. It operates hands-free or under manual control and features four independent brakes for extra safety, with no external parts that spin to cause injury or catch clothing.

The DEUS 3300 is easy and fast to use – simply clip in, set an anchor and let go. Get 3 people down from a 100 meter tower, crane or bridge, one at a time, in under four minutes!

Both kits are small and lightweight. The DEUS 3300 weighs just 0.9 kg. Add super-lightweight DEUS 7.5 mm rope (just 0.7 kg per 15 meters) and a pair of carabiners and the Escape kit is just 2.7 kg with 30 meters of rope. Plus, rope changes out easily, so you can carry several rope lengths and use what you need, when you need it.

Use the DEUS 3300 Industrial Escape & Rescue Kit for all of these rescue situations:

- Vertical rescue
- Bailout – hands free!
- Rapid sequential vertical rescues
- 2-person rescue
- Hands-free vertical positioning
- Travel restraint with single or double tie-off
- Confined space rescue
- Lifting and hauling with 2:1, 5:1 or 10:1 mechanical advantage over full length of rope
- Ladder rescue
- Rescue after a fall

## DEUS 3300 Industrial Escape & Rescue Kits

Industrial Escape & Rescue Kit (Part # K-I3300-1S)

Industrial Escape Kit (Part # K-I3300-2S)

Both feature DEUS 3300 Vertical Rescue Systems – rated for descents up to 100 m. NFPA certified.
