

DEUS® 7500 Challenge Course Belay System

Bring teambuilding to new heights in fun and safety.

The DEUS 7500 Challenge Course Belay System opens the door to a whole new world of fun and safety for high ropes course operators.

The 7500 gives participants a reliable safety line that automatically controls descent. Operators get a safe, reliable, automatic, hands-free belay, and the ability to offer exciting new elements.

Superior Safety Belay

The 7500 is a better, more reliable belay system for high elements. Its direct-drive centrifugal brake automatically engages to guard against free fall. And it does a "soft engagement" to prevent shock load and injury, for a more comfortable ride. This adds greater safety to existing high elements like the Leap-of-Faith.

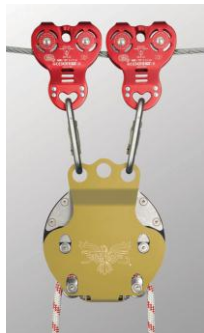

Building Teams and Fun

The DEUS 7500 also provides the foundation for exciting new high elements, including both personal and team challenges. Use the 7500 as the basis of a team vertical challenge where participants are maneuvered up, down, left and right by other team members with lead lines to perform tasks. Or offer participants the thrill of BASE jumping with less risk.

The 7500 offers something for everyone – more fun, communication and team interaction for participants, and a competitive advantage for course operators.

Constructed of anodized aluminum and stainless steel, the DEUS 7500 is built for all-day, every day use.

When lives are on the line, trust DEUS Rescue.
