

# DEUS™ Edge Pro

New materials and design for rope edge protection – an old idea just got better.

Running rope over window ledges, scaffolding or other edges puts stress on you and the rope. Rope edge protectors can help. But the DEUS Edge Pro takes it to a whole new level.

The intelligent design and superior materials do more to protect the rope and the person lifting. Here's how it works...

## New Materials

Traditional edge protectors typically use rubber coated nylon, or combine it with cotton canvas.

The new DEUS Edge Pro uses super durable and slick Teflon on the rope side. This reduces friction, which greatly reduces stress on the rope AND the work you have to do to lift.

## New Design

Old edge protectors require rolling over the rope. The DEUS Edge Pro is simple – just close the cover and Velcro holds the rope in place.

Plus the ingenious cross-direction ribs on the DEUS Edge Pro increase the radius of the edge. This means less stress on the rope...and less effort to lift heavy loads.

Super easy, super smart. The DEUS Edge Pro makes lifting easier on you and the rope.

DEUS™ Edge Pro

Part # DR100
