DEUSTM Wind Tower Escape & Rescue Kit

Big-time escape & rescue capabilities in one compact little kit, featuring the DEUS 3300.

The DEUS Wind Tower Escape & Rescue Kit is simply the smallest, lightest, safest, fastest and easiest to use full-featured escape and rescue kit available.

The kit is built around the DEUSTM 3300 controlled descent device – NFPA certified, 3 meters/second maximum descent speed.

The DEUS 3300 operates hands-free or under manual control and features four independent brakes for extra safety. Plus, the smart design has no external parts that spin to cause injury or catch clothing. And using the device is easy – simply clip in, set an anchor and let go. Get three people down from a 100 meter nacelle, one at a time, in under four minutes!

DEUS created this small, lightweight kit – just 9.5 kg – so it can be carried while climbing. Use it for all of these rescue situations:

- Vertical rescue
- Bailout – hands free!
- Rapid sequential vertical rescues
- 2-person rescue
- Hands-free vertical positioning
- Travel restraint with single or double tie-off
- Confined space rescue
- Lifting and hauling with 2:1, 5:1 or 10:1 mechanical advantage over full length of rope
- Ladder rescue
- Rescue after a fall

DEUS Wind Tower Escape & Rescue Kit

Part # K-W3300-1S

Features DEUS 3300 Vertical Rescue System – rated for descents up to 100 m. NFPA certified
