

“Help” without the “wait for.”

Rescue multiple people in minimal time.

The DEUS GR78 Multi-Rescue Descent Kit provides a fast, safe and reliable method for getting two or more (even hundreds) down to the ground in an emergency.

Disaster can strike quickly and without warning. Help can take precious minutes to arrive.

The DEUS Multi-Rescue Descent Kit puts your rescue solution right at hand and always on call. Designed around the innovative DEUS 7800 controlled descent system, it's quick to set up and easy to operate to get people out and down safely.

The DEUS 7800

The DEUS 7800 is an easy and automatic controlled descent system. Just connect a person, pull out the slack in the rope and let go. The 7800 does the rest. Because the system works in both directions, multiple people can evacuate, one-after-another, without re-rigging.

The 7800 features four redundant brakes and limits descent speed to guard against free fall.

The exclusive DEUS “Soft Engagement Technology” manages transition shock, reducing the risk of injury and increasing speed and efficiency.

Plus, the NFPA-certified 7800 is built for continuous use, so you can use it to rescue 200 people without risk of overheating like other systems.

Complete the Package

The DEUS Multi-Rescue Descent Kit comes complete with the DEUS 7800, DEUS 12 mm rope (choose from three available types, any length), and connectors, all packed in the DEUS Escape & Rescue Hard Case for compact stowing and easy access.

Add your choice of DEUS anchor kits, harnesses, helmets and gloves and you have a complete multiple-person rescue system.

The DEUS Multi-Rescue Descent Kit comes packed in a DEUS Escape & Rescue hard case to protect everything, store easily, and access quickly.

When lives are on the line, trust DEUS Rescue.
